Subject: **NPDES Permit No. TN0062537  
Notice of Incomplete Application  
Chemetall Foote Corporation  
New Johnsonville, Humphreys County, Tennessee**

Dear Mr. Fisher:

The Division of Water Resources (the division) has received your application for the above referenced project at the environmental field office on December 6, 2007. We have reviewed the application for completeness in accordance with TDEC rule 1200-4-5-.05 (2) and find the application to be incomplete. The processing of this application has been suspended until the following information has been submitted:

- All facilities that send their wastewater to an Exceptional Tennessee Water are required to perform an alternatives analysis as part of the application reissuance (TN Rule 1200-4-3-.06). The objective is to consider practical alternatives to degradation (discharge of pollutants) that may have become available since the last permit issuance. The alternatives analysis should include connection to an existing collection system, land application, water reuse, water recycling, or other treatment alternatives.
- The facility needs to measure the temperature of its wastewater at Outfall 001.

A complete application should be submitted at the address above within 30 days of the date of this letter. You should be aware that in accordance with TDEC Rule 1200-4-5-.05 (2), your receipt of this notice does not preclude the division from later requesting additional material that subsequent to the notice of completeness is determined to be necessary for permit processing.

If you have questions, please contact the Nashville Environmental Field Office at 1-888-891-TDEC; or, at this office, please contact Miss Julie Harse at (615) 532-0682 or by E-mail at [Julie.Harse@tn.gov](mailto:Julie.Harse@tn.gov).

Sincerely,

Vojin Janjić  
Manager, Permit Section  
Water Pollution Control
